# 1 Algoritmos

- 1.1 DP
- 1.2 Estruturas de Dados
- 1.3 General
- 1.4 Geometry
- 1.5 Grafos
- 1.5.1 DFS

```
1 const int MAX { 200010 };
3 bitset<MAX> visited;
4 vector < int > adj[MAX];
6 void dfs(int u)
      if (visited[u])
          return;
9
10
      // processa/visita u
11
      visited[u] = true;
13
14
      for (auto v : adj[u])
15
           dfs(v);
16
17 }
```

#### 1.5.2 BFS

```
vector<int> bfs(int s, int N) {
      vector < int > dist(N + 1, oo);
      queue < int > q;
      dist[s] = 0; q.push(s);
      while (not q.empty())
           auto u = q.front(); q.pop();
9
           // visita/processa u
11
           for (auto v : adj[u]) {
               if (dist[v] == oo) {
14
                   dist[v] = dist[u] + 1; q.push(v);
16
           }
17
      }
18
19
20
      return dist;
21 }
```

## 1.5.3 Dijkstra

```
1 using ii = pair<int, int>;
2 using edge = tuple<int, int, int>;
```

```
4 const int MAX { 100010 };
5 vector < ii > adj [MAX];
7 vector < int > dijkstra(int s, int N)
8 {
       const int oo { 1000000010 };
9
10
       vector < int > dist(N + 1, oo);
11
12
       dist[s] = 0;
13
14
       set<ii>> U;
15
       U.emplace(0, s);
16
       while (not U.empty())
17
18
           auto [d, u] = *U.begin();
19
           U.erase(U.begin());
20
21
           for (auto [v, w] : adj[u])
22
23
                if (dist[v] > d + w)
24
25
                {
                    if (U.count(ii(dist[v], v)))
                        U.erase(ii(dist[v], v));
27
28
                    dist[v] = d + w;
29
                    U.emplace(dist[v], v);
30
           }
32
33
34
35
       return dist;
36 }
```

#### 1.6 Math

### 1.6.1 Combinações

```
using 11 = long long;
3 11 binom(int n, int m)
4 {
       if (m > n)
5
           return 0;
      vector<ll> dp(m + 1, 0);
      dp[0] = 1;
10
11
       for (int i = 1; i <= n; ++i)</pre>
           for (int j = m; j > 0; --j)
12
               dp[j] = dp[j] + dp[j - 1];
14
      return dp[m];
15
16 }
```

## 1.7 Primitives
